Objective

Enthusiastic and results-driven Full Stack Developer and AWS Certified Solutions Architect with hands-on experience in data engineering, ETL pipelines, and cloud-based architectures. Proficient in Python, SQL (Oracle/PostgreSQL), and PySpark, with strong knowledge of AWS services including S3, RDS, DynamoDB, Glue, and Data Pipeline. Adept at building scalable, high-performance solutions using Terraform, Docker, and Linux/Unix. Passionate about leveraging big data and machine learning to solve real-world problems.

Key Technical Competencies

- Programming & Scripting: Python 3, SQL (Oracle/PostgreSQL), PySpark, C#.NET, PowerShell/Bash
- Cloud & Infrastructure: AWS S3, RDS, DynamoDB, Glue, Data Pipeline, EC2, Terraform, Docker, Linux/Unix
- Data Engineering: ETL design & automation, Big Data processing, data pipeline orchestration
- Machine Learning: YOLOv7 object detection, OCR, OpenCV, NumPy, Pandas, deep learning model training
- Development Tools: ASP.NET Core, MudBlazor, GitHub, Agile/Scrum methodologies

Experience

- **Amazon** March 2026 - Present
Cloud Support Engineer
Provided technical support for AWS cloud services, helping customers troubleshoot infrastructure, networking, and application issues.

Diagnosed and resolved problems across compute, storage, and networking services such as Amazon EC2, Amazon S3, Amazon VPC, and AWS Lambda.

Investigated customer incidents by analyzing logs, metrics, and system configurations using tools like Amazon CloudWatch.

Assisted customers in designing, deploying, and optimizing cloud-based solutions following AWS best practices.

Troubleshoot network connectivity issues, including DNS, routing, firewall configurations, and VPC networking.

Worked with internal engineering teams to escalate and resolve complex technical issues affecting cloud services.

Guided customers on security and access management using AWS Identity and Access Management (IAM).

Documented troubleshooting steps, known issues, and solutions to improve internal knowledge bases.

Delivered high-quality customer service while managing multiple support cases in a fast-paced environment.

Assisted customers with cloud migration, deployment automation, and performance optimization.

- **SpecCon Holdings** Jan 2025 - Dec 2025
.NET Developer
Developed and maintained a fully functional Learning Management System (LMS) using Blazor, MudBlazor, and Razor Components for the front-end UI.

Designed and implemented learners, facilitators, and clients pages with role-based access for administrators.

Created services, models, and DTOs to support modular and maintainable application architecture.

Built and consumed ASP.NET Core Web APIs to deliver and manage data between the front-end and backend systems.

Collaborated with the development team to deploy applications to Microsoft Azure and manage cloud-hosted environments.

Utilized GitHub for version control, branching strategies, and collaborative code reviews to ensure high code quality.

Optimized front-end performance and enhanced user experience through responsive design and component reusability.

Worked closely with cross-functional teams to ensure LMS features met business requirements and industry standards.

- **Forge Academy & Labs**

Jan 2024 - Dec 2024

AWS Cloud Practitioner Intern

Designed, developed, and deployed cloud-based solutions leveraging AWS S3 for scalable storage, AWS RDS for relational databases, and DynamoDB for high-performance NoSQL data handling.

Built and managed ETL pipelines using AWS Glue and AWS Data Pipeline for automated data ingestion, transformation, and transfer between systems.

Integrated PySpark for big data processing and transformation tasks.

Utilized Boto3 to automate AWS operations and manage service interactions programmatically.

Configured and managed networking services including Route 53, Direct Connect, CloudFront, and Elastic Load Balancing for high availability and low-latency delivery.

Implemented infrastructure provisioning with Terraform, ensuring repeatable and version-controlled deployments.

Deployed and managed applications in containerized environments using Docker on Linux/Unix systems.

Configured networking services (Route 53, CloudFront, Elastic Load Balancing) for high availability and performance optimization.

Applied best practices for cloud security, data storage, and backup processes across AWS environments..

- **Mindworx**

Nov 2023 - Mar 2024

Systems Developer

Airline Booking System (C#.NET): Designed and developed a booking system enabling flight reservations, ticket management, and customer data handling.

Student Management System: Built a platform for student registration, course enrollment, and secure access to the Learning Management System (LMS) through authenticated login credentials.

- **4IR Research Lab**

Jun 2022 - June 2023

Systems Developer & Machine Learning Engineer

Development of security system using Python, C#, PHP, MYSQL, for both software development and hardware configurations and integration[biometrics, keypad, rfid tag].

Development of Student Management Systems using Core PHP, C# and SQL, where students can register on the institution, choose their courses and be able to log in the LMS using their credentials.

Build and maintain industrial automation using Siemens PLC and IFM Smart PLC for defect cans conveyor belts and ripe and unripe fruits and vegs integrated with OpenCV for real-time detection.

Collected and pre-processed large datasets for ML pipelines using OpenCV, NumPy, and Pandas.

Developed a license plate detection system using YOLOv7 for object detection and OCR for text recognition.

Trained high-performance object detection models on large datasets, applying deep learning algorithms to improve accuracy and inference speed.

Education

- | | |
|---|------|
| <ul style="list-style-type: none">• Tshwane University of Technology
NDip. In Computer Systems Engineering
Completed | 2024 |
| <ul style="list-style-type: none">• Impoqabulungu Senior Secondary School
National Senior Certificate
Bachelor's Admission | 2016 |

Skills

- C#.NET
- ASP.NET CORE
- MudBlazor
- Python
- Linux
- C++
- MYSQL
- JavaScript
- NumPy
- PySpark
- Troubleshooting
- Amazon Web Services
- Communication
- Complex Problem Solving
- AWS EC2
- AWS S3
- Amazon VPC
- AWS Lambda
- Amazon CloudWatch
- AWS Identity and Access Management

Achievements & Awards

- AWS Certified Solutions Architect
- AWS Certified Cloud Practitioner
- Full Stack Web Development Certificate
- Hackathon Award Winning Project
- Forge Academy Top Achiever
- Salesforce Administration Certificate
- Salesforce AI Associate

Driver's License

- Code C1

Reference

- Available upon request
